G I L S O L
P O R T F O L I O

A B O U T U S

We are a Mexican company with more than 42 years of expertise. We are leaders in the rental and installation of infrared, digital and radiofrequency simultaneous interpretation systems, guided tours equipment, remote interpretation platform, parliamentary microphones, interactive voting systems, portable sound equipment. We offer highly qualified human resources including engineers, technical specialists, multilingual room officers, expert translators, and simultaneous interpreters endorsed by international organizations.

We are providers of worldwide recognized brands such as Sennheiser, Auditel, Taiden, Williams Sound and Meridia among others; but beyond our expertise and equipment, we are a group dedicated to total customer satisfaction. Our commitment to quality, service and personalized bilingual attention, 24 x 7, is what makes us who we are.

INTERNATIONAL
BRANDS

We receive support services directly from the global brands that we offer, as well as continuous training and maintenance services.

TAIDEN

MERIDIA
INTERACTIVE SOLUTIONS

EQUIPMENT

Parliamentary microphones by Sennheiser (ADN and SDC models) and Taiden

Infrared, digital and radio frequency simultaneous interpretation Systems by Sennheiser, Taiden and Williams Sound

Guided tours or tourguides, with or without simultaneous digital and radio frequency interpretation, by Sennheiser and Williams Sound

Remote Interpretation Platform

Wireless and portable audio equipment by Mipro

Interactive voting by Meridia

GuidePORT audioguides by Sennheiser

PARLIAMENTARY MICROPHONES

We offer top of the line digital parliamentary microphones by German manufacturer Sennheiser, ranging from the robust SDC8200, featuring voting and simultaneous interpretation, to the latest ADN (Audio Distribution Network) which records general audio and audio from each microphone in WAV format, featuring redundancy for enhanced performance safety, two integrated speakers to ensure room audio, monitoring capability from an iPad or iPhone device, immunity to inductive interferences from nearby devices such as cell phones and fine Sennheiser mic capsule for a crystal clear sound.

The President's microphone can grant/revoke the floor to/from a specific microphone or the entire assembly.

The fully digital Taiden conference system incorporates voting and channel selection in a single unit.

SIMULTANEOUS INTERPRETATION

- Infrared, digital or radio frequency
- Sennheiser, Taiden and Williams Sound
- Fixed or mobile setups (guided visits with digital and radio frequency systems)

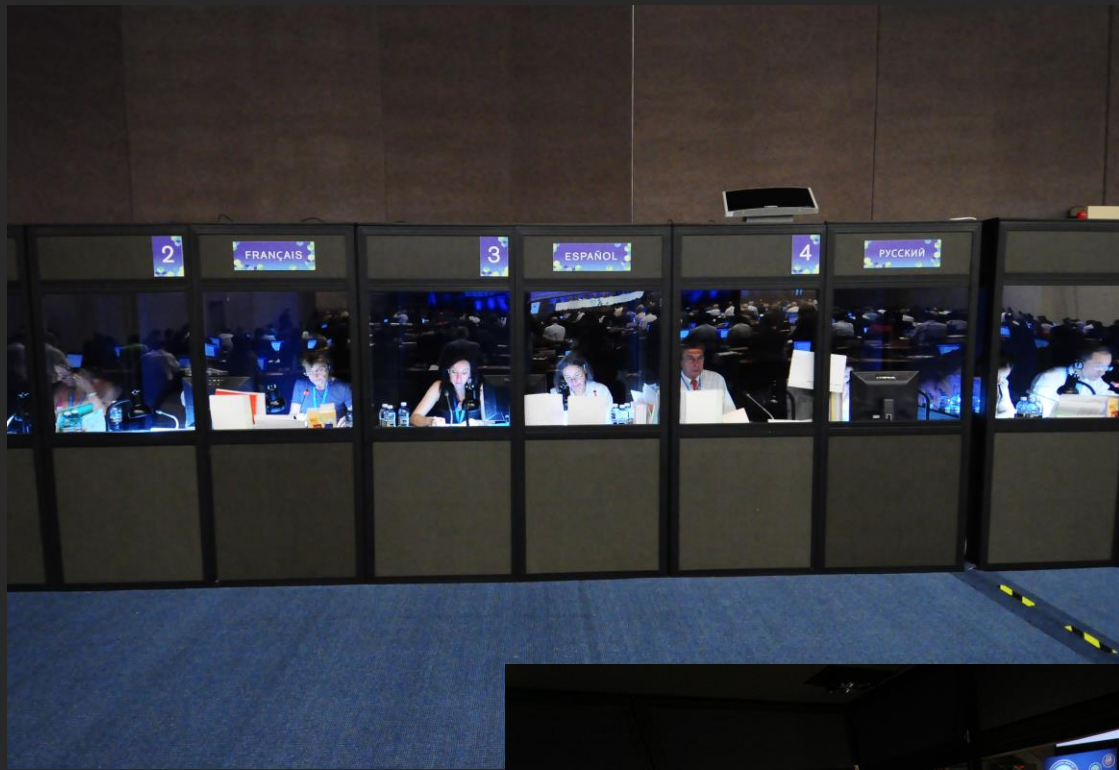

S E N N H E I S E R

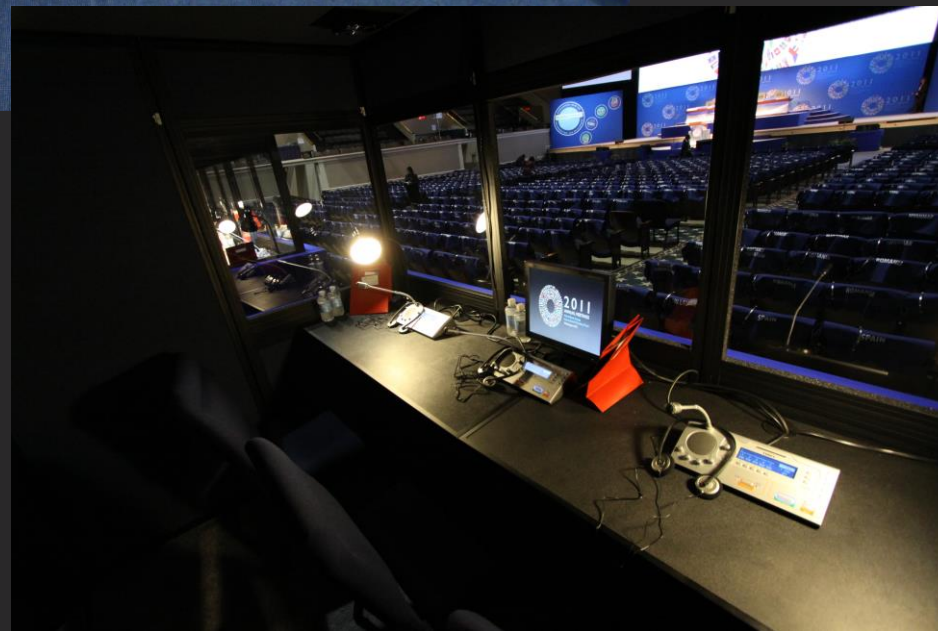

Single-channel, two-channel or multi-channel infrared system

The German manufactured infrared beam Sennheiser system offers up to 16 transmission channels with total confidentiality (the information does not leave the room) featuring the stethoset lightweight receiver.

Our booths for two or three interpreters comply with applicable ISO rules.

W I L L I A M S S O U N D

Williams Sound radio frequency systems are reliable, practical and versatile. Featuring 16 selectable channels.

We offer the new generation of stationary transmitters, with an LCD screen for easier audio configuration for speech, music or assistive listening.

W I L L I A M S S O U N D

Portable systems for simultaneous interpretation or guided tours.

These affordable equipment does not require a technician and is ideally suited for tours, work meetings and interviews.

Multichannel receivers.

Various headset options.

S E N N H E I S E R

T O U R G U I D E S Y S T E M

The tourguide can be used for simultaneous interpretation or in guided tours for groups.

Lightweight design and easy to operate.

Up to 4 simultaneous systems with no interference (one transmitter microphone per system).

M I P R O P O R T A B L E A N D W I R E L E S S A U D I O

Wireless speakers with rechargeable battery.

Wireless interlinking option (from the main speaker to the various slave units, for events of up to 1000 people).

Built-in 250-watt amplifier, up to 4 wireless microphones, retractable handle and wheels for ease of transportation.

Ideal for remote locations, mobile events with critical set up time as it does not require preliminary installation.

The "EZ-VOTE" System is the most simple, profitable and intuitive in the market. It allows exhibitors, educators and trainers to integrate audience participation in a PowerPoint presentation, generating feedback and immediate results output, thus achieving memorable interactive sessions.

- **100% integration with PowerPoint**

The software is fully integrated into the presentation, allowing the user to quickly and easily insert questions as a slide, anywhere in the presentation, even in an on-going presentation.

- **Data portability and immediate reporting**

The submitted answers are captured, compiled and projected at the user's request. All data is easily accessed and converted to a variety of compatible formats (Excel, Word, CSV and HTML).

M E R I D I A C O N T R O L S F O R I N T E R A C T I V E V O T I N G

Suitable size for all participants - Ergonomically designed for the adult user, its shape provides ease of use, including display of selected submissions in Alpha-Numeric formats.

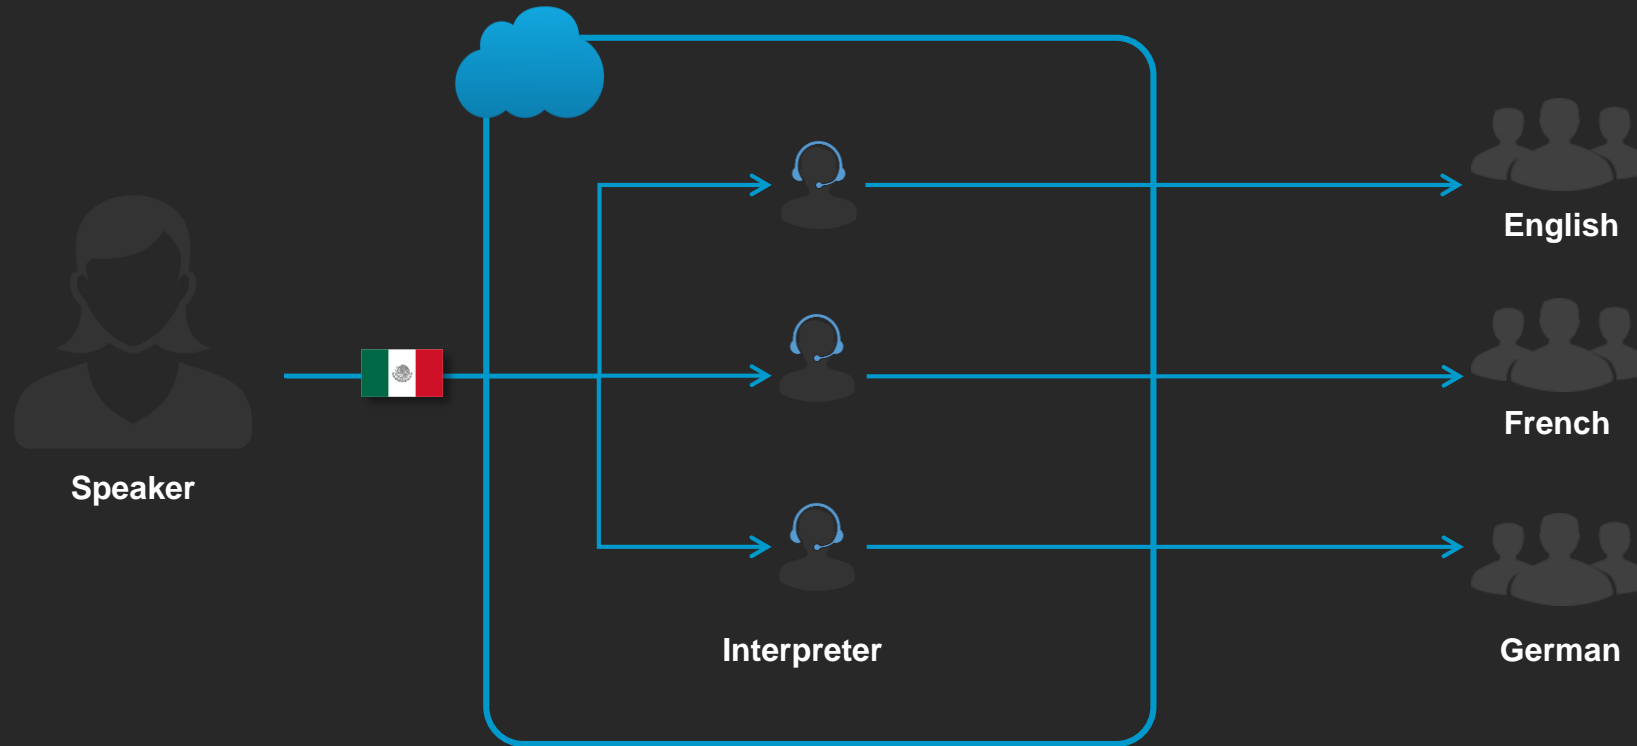

LED screen - The display screen indicates the selected option for each answered question and features a mechanism confirming that the selection has been submitted.

Reliable and accurate - Unlike other systems that operate on a single frequency, our system relies on a patented digital multi-frequency scanning of 75 frequencies, eliminating interference, collisions and vote corruption.

REMOTE INTERPRETATION

Your presentation is interpreted live
into any language

Your message reaches your audience in
their preferred language
So you may concentrate on what you
say rather than on how you say it.

REMOTE INTERPRETATION

**Professional simultaneous
interpretation**

**Transmission platform
via the Internet**

- **One platform for two services**
- **Serves up to 2,500 participants**
- **Unlimited number of languages**
- **Require no additional software or equipment**
